

ELECTROSTEEL CASTINGS LIMITED
MINES DEPARTMENT

As a part of our backward integration plan, we are developing a captive virgin coal block (having a geological reserve of 230 million tons of prime coking coal) near Bokaro, in the state of Jharkhand, India. The construction of mine entries (a pair of inclines and shafts) to access the coal seams is under progress with design from Ukraine and China and with involvement of both Chinese and Ukrainian manpower at our site. Inclines are expected to intersect coal seam within a period of next 5-6 months.

The mine is gassy (degree III) and has difficult geo-mining conditions. Keeping this in view, it is proposed that during the next phase of mine development and coal production, Powered Support Long Wall (PSLW) technology shall be deployed for coal extraction and “Continuous Miners” shall be used for developing the main dip and long wall gate road.

It has therefore, become expedient for us to develop a NEW TEAM FOR OPERATION AND MAINTENANCE OF CONTINUOUS MINER TECHNOLOGY for which we propose to recruit the following categories of manpower:

<u>Sr. No.</u>	<u>Manpower</u>	<u>Qualification</u>	<u>Experience</u>	<u>No. of openings</u>
1	Continuous Miner Operator	School Final and above	1 year mine operation experience in actual drivage operator	4
2	Shuttle Car Operator	School Final and above	1 year mine operation experience in actual drivage operator	7
3	LHD Operator	School Final and above	1 year mine operation experience in actual drivage operator	4
4	Feeder Breaker Operator	School Final and above	1 year mine operation experience in actual drivage operator	4
5	Roof bolter Operator	School Final and above	1 and 1/2 years of bolting experience including minimum 6 months work on the specific equipment	7
6	Electrical Supervisor	Diploma in Electrical	2 – 3 experience in underground mine with 1 year in gassy mine	1
7	Mining Sardar	DGMS Certificate	2 years of experience in underground mining, 1 year in gassy mines	4
8	Overman	DGMS Certificate	2 years if experience in underground mining, 1year in gassy mines	4
9	Assistant Manager	Graduate Mining Engineer with 1 st /2 nd Class Coal Mine Manager's Certificate	3 years of experience in underground mining, 1 year in gassy mines	3

Apart from the above, we shall require further manpower for [operating / maintaining](#) the Continuous Miner.

Interested [candidates](#) can email their detailed CV to mines@electrosteel.com or [send the same to](#)
